Introduction

Synth Anthology 4 – Synthesizer Tour de Force

THE ULTIMATE HARDWARE SYNTH COLLECTION

Synth Anthology 4 delivers a dreamlike collection of 200 hardware synths, professionally designed patches, fun and creative features, and powerful performance controls, all in an easy-to-use interface with the authentic sound of real hardware.

THE BEST KEEPS GETTING BETTER

What's new in version 4? Almost everything!

We've rebuilt the engine from the ground-up, added more synths, more presets, more effects, more filters, more modulation, a dedicated browser, a second fully-customizable layer for creating hybrid and blended timbres, an all-new smart suggestion engine that helps you quickly find similar sounds, a more powerful arpeggiator/phraser, bus effects, native MPE support, and more!

Synth Anthology 4 represents a massive leap in capability, creativity, workflow, and all-around synth goodness.

TIMELESS SOUND

Real Hardware Sounds - There is something unmistakable about the sound of a real hardware synth, from subtle differences between voice circuits and drift to the varied way filters bite into the sound; there's a distinct character and energy. Synth Anthology 4 delivers the authentic and uncompromising hardware sound with all the conveniences of a modern software instrument.

Every piece of hardware represents a unique creative vision, sonic character, innovations, and strengths. Whatever you're looking for, from analog to digital, vintage classic to future classic, you will find it here. Synth Anthology 4 delivers an incredible collection of hardware, every major manufacturer, every type of synthesis, every era, 200 synthesizers in all.

You won't find a more complete collection anywhere else.

ADVANCED ENGINE

Add depth, detail, and create sounds never heard before with Synth Anthology 4's powerful dual-layer engine. Use it to layer any two synth sounds together, and modulate the mix. Each layer is fully editable, providing deep sound design potential, and with a truly massive library of hardware synths on-hand, the possibilities are endless.

Advanced Modulation - Synth Anthology 4 delivers a powerful modulation system allowing everything from subtle to extreme movement to be freely added and customized across a wide range of parameters. Choose between a number of sources including two flexible LFOs, two multi-step modulators with variable smoothing, velocity, and modwheel, each assignable through a handy parameter-based editor.

NEW WAYS TO INTERACT

Machine Learning - One of the coolest features of Synth Anthology 4 is the all-new proximity explorer, a smart suggestion system that analyzes the sonic attributes of the currently loaded sound and compares it against the entire SA4 library, immediately providing another 8 sound options to explore and remix. It's a fast way to create variation, audition related sounds, and a wonderful rabbit hole of exploration.

Infinitely Expressive - Synth Anthology 4 includes native MPE support, giving adopters of this new generation of controller extended performance capability right out of the box. Additionally, 5 main page effect macros and deep modwheel integration mean that you are never more than a touch away from giving your sound a personalized edge.

Whether you're a synth fanatic, sound designer, or producer looking to expand your range, Synth Anthology 4 is jam-packed with powerful features and outstanding value delivering the authentic sounds of 200 vintage and modern hardware in feature-packed software instrument.

Minimum System Requirements

- Latest version of UVI Workstation or Falcon
- 21GB of disk space

For more information on the installation process, please refer to the document:

[Install Guide](#)

User Interface - Main

1 Preset Menus

- » **Preset** - Change presets with drop-down menu or by using the [◀] [▶] buttons
- » **Options** - Click to access the commands by drop-down menu
- » **Load** - To load a user preset
- » **Save** - To save a new preset

2 Pages

Change current page: Main, A and B layer, Seq and FX

3 Settings

- » **MPE**
- » **Power** - Click to enable MPE mode
- » **MPE Bend** - Set pitchbend range in MPE mode
- » **Voices** - Set the global polyphony
- » **Bend** - Set the global pitchbend range

4 Master Volume

Set the global output level with VU

5 Layer Controls (A, B)

- » **Power Layer** - Click to disable the layer
- » **Sound** - Select the layer sounds by menu browser by using the [◀] [▶] buttons

- » **[Undo selection]** - Click to exit browser without sound changes
- » **Autoload** - Enables automatic load the sound
- » **X [Close]** - Click to close the browser
- » **Edit** - Click to access to the layer edit page
- » **Proximity Explorer** - Utilize a machine-learning powered smart suggestion engine to quickly find varying but related sounds
- » **[Circle Dot]** - The currently loaded sound
- » **[Small Dots]** - The 8 sound suggestions
- » **[Re-Suggestion]** - Click to load other suggestions
- » **Keyboard Range** - Click-drag or double-click to set the range of notes that each layer will respond to
- » **The left note (e.g. C-2)** - Set the lowest note of the range
- » **The right note (e.g. G8)** - Set the highest note of the range
- » **Layer Volume** - Click-drag or double-click to set the layer volume

6 Layer Crossfader

A layer crossfader with dedicate modulator

- » **Layer XFade** - Click-drag to manually set the balance between layer A and B
- » **Modulation Depth** - Click-drag the knob [with shape icon] to set the layer crossfade modulation
- » **Invert Modulation** - Click to invert the direction of the crossfade modulation
- » **Layer XFade Modulation Shape** - Click-drag the knob above The Modulation Activate switch to set the modulation waveform
- » **Host Sync** - Enable/disable the modulation speed sync to host (DAW project) tempo
- » **Layer XFade Modulation Speed** - Click-drag the knob above the Tempo Sync switch to set the modulation speed in Hertz (sync off) or musical interval

7 Macro Effects

5 "one-knob" effects for quick tweaking of the sound

- » **Power** - Click to enable the effect
- » **Tone** - Adjusts the sound from bright and shiny to warm and fat without gain increasing or loss
- » **Phase** - Adds a phasing-like chorus effect
- » **Crush** - Adds crunch and excites the sound
- » **Cloud** - Adds airy space and width
- » **Feedback** - Adjusts the amount of the Feedback Machine (send effect) globally

User Interface - Layer Edit

1 Layer & Amplitude

- » **Sound** - Select the layer sound by menu or by using the [<] [>] arrows
- » **Sound Commands** - Click to access the commands by drop-down menu
Reset Parameters - Reset the layer settings
- » **Gain** - Adjust the overall layer level
- » **Pan** - Adjust the layer's stereo pan position
- » **MIDI Curve** - Click and drag to adjust the curve of dynamics response
- » **Smooth Filter** - Set the velocity amount of LP 6dB/oct filter for smooth timbre changes
- » **ADSR** - Adjust the layer level over time using an Attack/Decay/Sustain/Release envelope
- » **Attack and Decay Curve** - Click-drag to adjust the curve of attack and decay/release envelope stages

2 Filter

- » **Power** - Activate the filter
- » **Mode** - Set the filter mode, Xpander, VCF-20 and Comb.
Xpander filter can select between lowpass, bandpass, and highpass filter shapes
- » **Cutoff** - Set the filter cutoff frequency
- » **Q** - Set the filter resonance amount
- » **Drive** - Set the filter drive amount (Xpander)
- » **LP/HP** - Set the filter to high-pass or low-pass mode (VCF-20)

- » **Plus/Minus** - Set the filter polarity (Comb)

- » **Depth** - Set the filter depth amount
- » **ADSR** - Typical ADSR envelope for the Filter
- » **Attack and Decay Curve** - Click-drag to adjust the curve of attack and decay/release envelope stages

3 Pitch & Voicing

- » **Voice Mode** - Set the voice mode between Poly, Poly Portamento, Mono Retrigger, Mono Portamento and Legato
- » **Octave** - Transpose the pitch in octaves
- » **Color** - Shifts color based on adjacent samples
- » **Pitch** - Fine-tune the pitch in cents
- » **Depth** - Set the depth of the pitch envelope
- » **Time** - Set the pitch glide time
- » **Time Curve** - Click-drag to adjust the curve of the glide time

4 Unison

- » **Power** - Activate the unison
- » **Voices** - Set the unison voices up to 8
- » **Detune** - Adjusts the detune amount of the unison layer[s]
- » **Spread** - Adjusts the stereo width

5 Layer FX

Click FX tab to access the Layer Effects

See [page 7](#) for more details

6 Modulators

Click the switch at the left of the knobs to show the available Modulators for the parameter, between LFO 1, LFO 2, Step Modulator 1 and Step Modulator 2 and more

See [page 8](#) for more details

User Interface - Layer Effects

1 Layer Edit [<]

Click the tab to access the Layer Edit page

2 Wave Shaper

- » **Power**  - Activate the effect
- » **IN** - Set the input gain
- » **Out** - Set the output gain
- » **Mode** - Set the shaping curve of the effect
- » **Amount** - Set the effect amount
- » **Mix** - Set the effect dry/wet balance

3 Flanger

- » **Power**  - Activate the effect
- » **Frequency** - Set the modulation speed
- » **Host Sync Off** - Set the speed in Hz
- » **Host Sync On** - Set the speed in musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Host Sync**  - Enable/disable the modulation speed sync to host [DAW project] tempo
- » **Delay** - Set the delay time of the effect
- » **Feedback** - Set the feedback amount
- » **Mix** - Set the effect dry/wet balance

3 Chorus

- » **Power**  - Activate the effect
- » **Speed** - Set the modulation speed
- » **Depth** - Set the modulation depth
- » **Edge** - Control the color of the chorus
- » **Mix** - Set the effect dry/wet balance

4 Phaser

- » **Power**  - Activate the effect
- » **Frequency** - Set the modulation speed
- » **Host Sync Off** - Set the speed in Hz
- » **Host Sync On** - Set the speed in musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Host Sync**  - Enable/disable the modulation speed sync to host [DAW project] tempo
- » **Order** - Set the phase shift order
- » **Feedback** - Set the feedback amount
- » **Mix** - Set the effect dry/wet balance

6 Equalizer

- » **Power**  - Activate the effect
- » **High** - Set the high frequency band gain
- » **Mid** - Set the middle frequency band gain
- » **Low** - Set the low frequency band gain
- » **Crossover Frequency** *f* - Set the frequency between low and middle bands, and between middle and high bands

7 Send FX

- » **Power**  - Activate the sends per effect, Sparkverb, Convolution, Delay and Feedback
- » **Send Level** - Set the send level per effect

8 Modulators

Click the switch at the right of the knobs to show the available Modulators for the parameter, between LFO 1, LFO 2, Step Modulator 1 and Step Modulator 2 and more

See [page 8](#) for more details

User Interface - Modulation Edit

1 LFO A

Click LFO A label (left) to access the modulator

- » **Power** - Enable/disable the LFO
- » **Shape** - Select the modulation shape
- » **Frequency** - Adjust the modulation speed
- » **Host Sync Off** - Set the speed in Hz
- » **Host Sync On** - Set the speed in musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Host Sync** - Enable/disable the modulation speed sync to host (DAW project) tempo
- » **Phase** - Adjust the LFO start phase
- » **Delay** - Set the delay time of the LFO starts
- » **Rise** - Set the rise time of the LFO amount
- » **Depth** - Set the modulation depth amount
- » **Mode** - Set the voice mode between Legato and Retrigger

2 LFO B

Click LFO B label (left) to access the modulator

- » **Power** - Enable/disable the LFO
- » **Shape** - Click to choose the shape from menu

- » **Frequency** and **Host Sync** - See LFO A
- » **Humanize** - Adjust the randomize amount
- » **Smooth** - Adjust the smoothing amount
- » **Invert** - invert the LFO phase
- » **Mode** - Select Legato or Retrigger voice modes
- » **Depth** - Set the modulation depth amount

3 Step Modulator

Click Step A or Step B label (left) to access each step modulator

- » **Step Editor** - Click-drag to set the modulation amount per step
- » **Shift** - Shift steps left or right by using the [**<**] [**>**] arrows found on the sides of the Step Editor
- » **Step Pattern Menu** - Click to open the Step Pattern Panel to select a preset pattern

- » **Bipolar** - Enable/disable Bipolar mode
- » **Smooth** - Click to smooth the transition between steps
- » **Invert** - invert the modulation pattern
- » **Clear** - Initialize the pattern
- » **Steps** - Set the number of steps
- » **Speed** - Adjust the modulation speed
- » **Host Sync** - See LFO A
- » **Smooth** - Adjust the overlap between steps
- » **Mode** - Select Legato or Retrigger voice modes

4 Modulation Amount

Internally-modulatable parameters have small circles at the left of their knobs

Click-drag the available circles to set the modulation amount. You can also click the Open Modulation Panel button for more precise control

5 Open Modulation Panel

At the right of modulatable parameters, click the button to open the Modulation Panel

[Undo Edits] - Click to exit the editor without changes

X [Close] - Click to close the editor

User Interface - Arpeggiator Edit

1 ► Arpeggiator

Click A or B tab to select the Arpeggiator to edit

- » **Power** - Enable/disable the Arpeggiator
- » **Mode** - Click to set the arpeggiator mode: Arpeggiator, or Phraser
- » **Octave Low/High** - Lock the sequence in a specific octave range, with lowest and highest octave [Phraser mode only]
- » **Motion** - Click to set the arpeggiator motion as played, up, down, or up+down [Arp mode only]
- » **Speed** - Set the step duration
- » **Steps** - Set the number of steps
- » **Octave** - Set the octave range of the arpeggiation
- » **Step Editor**
 - Vel - Click-drag to set the velocity
 - Link - Enable to sustain the previous step
 - Mode - Set the step type (Basic, Harmonized or Chord) based on mode
 - Pitch - Set a pitch offset in semitones
 - Octave - Set a pitch offset in octaves
 - Gate - Set the step gate duration
 - Pan - Set the step pan
 - ✓ - Click the triangle button to right side of each row to either initialize, randomize, or select a preset.

2 ► Preset

Change presets by drop-down menu or by using the [**<**] [**>**] arrows

3 ► Chord Detector

Indicates the chord type detected from current incoming MIDI notes

4 ► Shift

Shift a step ahead or behind by using the [**<**] [**>**] arrows at both side of the Step Editor

5 ► Dual

Enable/disable the dual arpeggiator mode, Arp B uses Arp A arpeggiation

User Interface - FX

1 Send FX

- » **Sparkverb**
Power - Enable/disable the effect
Size - Set the reverb room size
Decay - Set the reverb decay time
High/Low - Multiplies the decay time [-/+] for the high and low frequencies
Gain - Set the output gain of the effect
- » **Convolution**
Power - Enable/disable the effect
IR - Select an IR by drop-down menu or by using the arrows
Time - Set the reverb time
PreDelay - Set the time before reverb starts
Width - Adjust the stereo width of the reverb from mono to wide stereo
Gain - Set the output gain of the effect
- » **Dual Delay**
Power - Enable/disable the effect
Time - Set the delay time
Feedback - Set the delay feedback amount
High/Low Cut - Set the delay output's High-Cut and Low-Cut filter frequencies
In/Out Width - Adjust the stereo width of the effect at input stage and output stage
Gain - Set the output gain of the effect
- » **Feedback Machine**
Power - Enable/disable the effect
Comb - Set the comb filter amount
BP Cutoff - Set the cutoff filter frequency of the band-pass filter
Gain - Set the output gain of the effect

2 Global Bus FX

- » **Drive**
Power - Enable/disable the effect
Amount - Set the drive amount
Tone - Adjust the brightness of the effect [Lowpass filter frequency]
Gain - Set the output gain of the effect
- » **Equalizer**
Power - Enable/disable the effect
Gain - [High/Mid/Low] Set the gain amount [+/-] for each band
Mid f - Set the frequency of the Mid band
- » **Maximizer**
Power - Enable/disable the effect
Threshold - Set the input level at which limiting will begin
