World Suite³

Introduction

World Suite 3

Instruments from Around the Globe

Unlock the World's Sonic Palette

World Suite invites you on an unparalleled sonic journey across continents and cultures, blending the rich tapestry of global music with the power of cutting-edge technology. Whether you're a seasoned composer, an aspiring producer, or an enthusiast exploring new sounds, World Suite offers a gateway to over 80,000 samples through 430 meticulously recorded instruments, 1,900+ hand-crafted presets, and 12,000+ loops and phrases from every corner of the globe.

Dive into the rhythms of Africa, the intricate timbres of Asia, the ancient chants of the Americas, and the mystical sounds of the Middle East—all at your fingertips. But World Suite is more than a collection; it's a source of inspiration, sparking your creativity with authentic, deeply immersive sounds that let you craft with unrivaled authenticity and depth.

More Than Just Instruments

Rebuilt from the ground up, World Suite 3 inspires creativity and discovery not only with individually playable instruments, but 2 powerful 'Traveler' instruments; World Traveler, and Voice Traveler – delivering instant access to over 12,000 loops and phrases, played by professional musicians and perfectly captured, ready to be shaped into your next project. Whether you're looking for authentic instrumentation to anchor your production or simply need a burst of inspiration, the Traveler instruments make it easy to explore, mix, and manipulate sounds from around the world, all within an intuitive and powerful interface.

Contents

AFRICA - 54 Instruments + 744 Loops & Phrases
NORTH AMERICA - 26 Instruments + 802 Loops & Phrases
SOUTH AMERICA - 31 Instruments + 1,355 Loops & Phrases
ASIA - 95 Instruments + 354 Loops & Phrases
AUSTRALIA - 16 Instruments + 485 Loops & Phrases
EASTERN EUROPE - 17 Instruments + 1,571 Loops & Phrases
SOUTHERN EUROPE - 16 Instruments + 2,187 Loops & Phrases
WESTERN EUROPE - 53 Instruments + 762 Loops & Phrases
INDIA - 48 Instruments + 1,735 Loops & Phrases
MEDITERRANEAN - 35 Instruments + 336 Loops & Phrases
MIDDLE EAST - 24 Instruments + 1,942 Loops & Phrases
WEST INDIES - 15 Instruments + 707 Loops & Phrases

World Suite is more than just a collection of sounds — it's a portal to the rich, diverse musical traditions of our world. With incredible sound quality, meticulously recorded instruments, and an intuitive interface that invites creativity, it's a powerful tool for composers, producers, and sound designers alike.

Whether you're crafting a cinematic score, adding authentic global textures to your music, or simply exploring new sonic landscapes, World Suite empowers you to bring the world's music into your own. Dive in and discover the endless possibilities that await within this epic suite of instruments and sounds.

Minimum System Requirements

- Latest version of UVI Workstation or Falcon
- 35.6GB of disk space

For more information on the installation process, please refer to the document: [Soundbank Installation Guide](#)

World Suite³

Global Guide

Summary

World Suite 3 is a deep and nuanced collection with many unique features, here are a few:

- **Oriental Ensemble** delivering classical Middle Eastern phrases (Arabic, Turkish and Persian)
- **Solo Wind Instruments** have a natural legato mode and portamento that you can trigger from the pedal
- **African Balafon, Mbira** and **Sanza** have discrete body and transient samples to help shape the sound
- **African Karimba** allows mixing of discrete noise and body samples
- **Laotian Zither**, as well as some other stringed instruments, use a modeled tremolo with speed selection and modwheel control
- **Gong instruments** are provided and were designed with their root notes in order so that they can be played melodically
- **Dan Moi** allows rhythms to be played with the left hand and melody with the right
- **Taiko** drums were recorded with 4 mics that can be independently dialed-in
- **Australian Didgeridoo** and **Flutes** are special instruments built with key-switchable, tempo-mapped phrases
- **Celtic Concertina** provides a beautiful sound with adjustable key noise
- **Flamenco Rhythm instrument** includes over 1,000 samples of flamenco guitar rhythms implemented with a chord recognition script and can be played at any tempo and in any key
- **World Traveler instrument** is a fantastic tools for quickly creating musical layers and sketches
- **Voice Traveler instrument** provides the same fast workflow but with human voices
- **Loops and Phrases** can be drag-and-dropped from UVI Workstation's or Falcon's browser

Categories

World Suite represents a massive collection of instruments and samples. In order to make finding what you're looking for easier, the content has been carefully organized by both region and instrument type.

By REGION

An epic collection of 430 instruments and 1,900+ ready-to-use presets at your fingertips. Perfect for composers, musicians, and anyone seeking unique timbres, these meticulously recorded instruments cover every major geographical region and ethnic tradition. Divided into 12 groups by geography and ethnography including Africa, Asia, Australia, Eastern / Southern / Western Europe, India, Mediterranean, Middle East, North / South America and West Indies.

By TYPE

Divided into 6 groups by instrument category including Fretted (String), Metal and Gong, Keyboards, Percussion, Strings, and Woodwind.

LOOPS & PHRASES

A massive collection of loops and phrases is your go-to resource, with over 12,000 expertly performed and recorded samples.

These loops are a treasure trove of instant inspiration, providing authentic, region-specific performances that can be easily arranged, chopped, and reshaped to suit your needs.

WORLD TRAVELER

The gateway to global inspiration, combining instrumental loops and phrases from each region into a single, versatile tool.

With over 350 presets hand-crafted by professional sound designers, World Traveler puts the world's music at your fingertips in the most intuitive way possible.

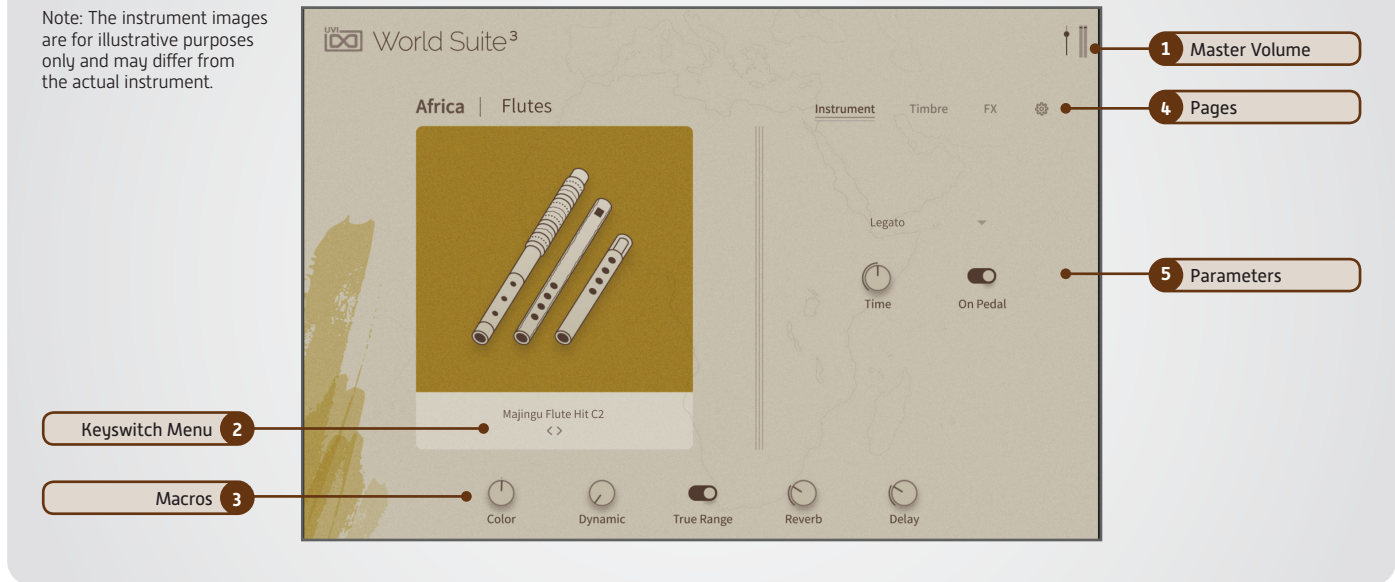

VOICE TRAVELER

Featuring vocal loops and phrases performed by singers from around the globe, Voice Traveler offers a unique tool for exploring the rich, emotive power of the human voice across different cultures.

Voice Traveler offers a treasure trove of vocal sounds that are as inspiring as they are versatile.

UI - Solo Instrument - Global

Note: The instrument images are for illustrative purposes only and may differ from the actual instrument.

1 ► Master Volume

Set the global output level with VU

2 ► Keyswitch Menu

Change the active layer or instrument model

3 ► Macros

» Color

Shifts color based on adjacent samples

» Dynamic

Adjusts the global amplitude velocity amount

» True Range

Switches key range between full or the instrument's actual range

switch on

switch off - No Keyswitch available

» Reverb

Adjusts the reverb amount

» Delay

Adjusts the delay amount

4 ► Pages

Change current page: Instrument (if available), Timbre, FX, and Settings ⚙️

5 ► Parameters

» Instrument

Access instrument-specific parameters. The available parameters vary depending on the instrument

See the *Unique Parameters pages* for more detail

Note: Some instruments do not offer this tab

» Timbre

Access parameters related to the sound's timbre and modulation

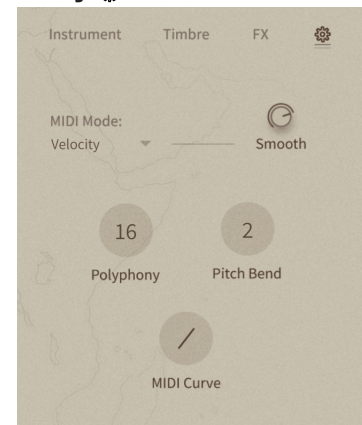

See *Page 7* for more detail

» FX

Access the built-in effects and the parameters

See *Page 8* for more detail

» Settings ⚙️

MIDI mode - Set the expression mode

Velocity - Note velocity determines note volume and timbre (when relevant)

Modwheel - Use your MIDI controller's Modwheel to determine note volume and timbre

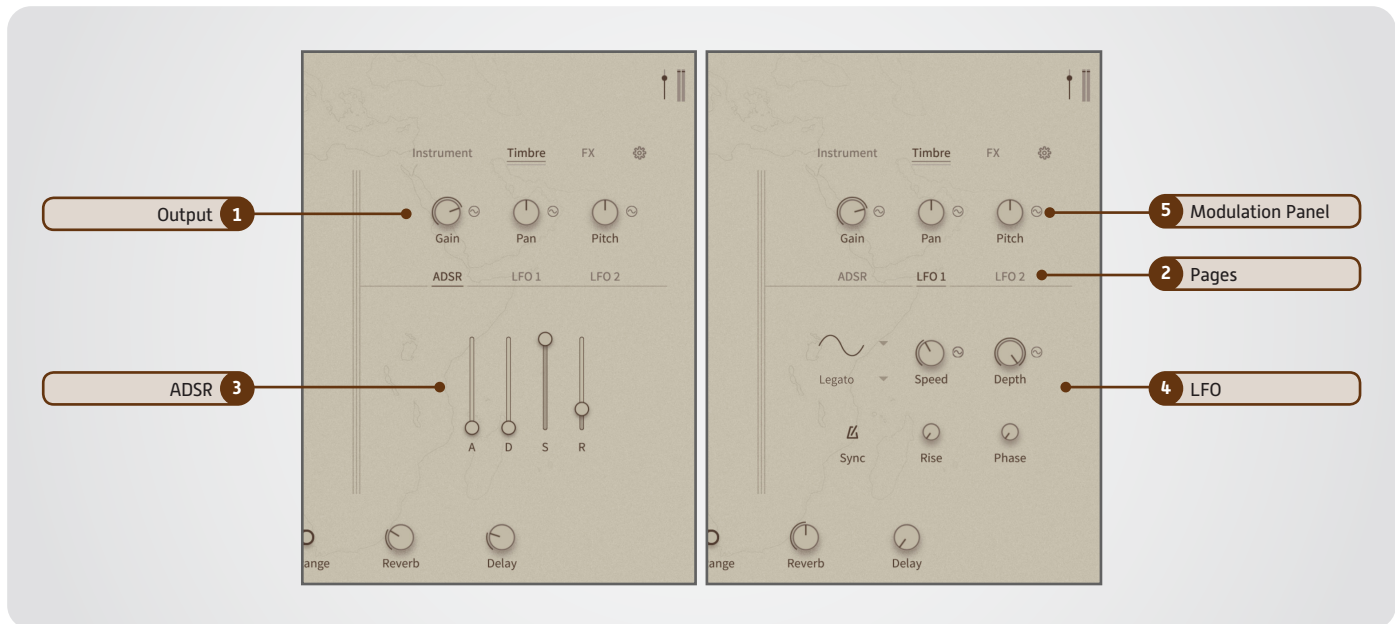

Smooth - Adjust the overlap between the layers

Polyphony - Set the polyphony

Pitch Bend - Set the pitchbend range

MIDI Curve - Adjust the MIDI response

UI - Solo Instrument - Timbre

1 ► Output

- » **Gain**
Set the instrument gain before FX
- » **Pan**
Set the stereo position
- » **Pitch**
Adjust the instrument pitch

2 ► Pages

Change current timbre page: ADSR, LFO 1 and 2

3 ► ADSR

Click ADSR label to access the modulator.
Adjust the layer level over time using an Attack [A]/Decay [D]/Sustain [S]/Release [R] envelope

4 ► LFO

- Click LFO 1 or 2 label to access the modulator
- » **Shape**
Select the modulation shape
- » **Mode**
Set the voice mode between Legato and Retrigger
- » **Speed**
Adjust the modulation speed
Host Sync Off - Set the speed in Hz
Host Sync On - Set the speed in musical units such as 1/4, 1/8 dots, 1/16 triplet, etc.
- » **Depth**
Set the modulation depth amount
- » **Host Sync**
Enable/disable the modulation speed sync to host [DAW project] tempo
- » **Rise**
Set the rise time of the LFO amount
- » **Phase**
Adjust the LFO start phase

5 ► Modulation Panel

At the right of modulatable parameters, click the button to open the Modulation Panel

[Undo Edits] - Click to exit the editor without changes

X [Close] - Click to close the editor

UI - Solo Instrument - FX

1 ► Pages

Change current FX page: Reverb, Delay and EQ

- » **Power** - Click to enable/disable the effect

2 ► Delay

» Delay modes

Digital - Typical digital delay

Tape - Tape Echo

Velvet - A smooth aura of echoes

- » **Time** - Set the delay time
- » **Width** *[Digital mode]* - Adjusts the stereo width
- » **Rate** *[Tape mode]* - Set the rate of delay repeats
- » **Feedback** *[Digital & Tape mode]* - Set the delay feedback amount
- » **LP** *[Digital mode]* - Low-pass filter for the delay signal
- » **HP** *[Digital mode]* - High-pass filter for the delay signal
- » **Diffusion** *[Velvet mode]* - Set the amount of diffusion [echo density]
- » **Spread** *[Velvet mode]* - Set the time spread of the diffusion

3 ► Reverb

» Reverb modes

Parametric - Sparkverb

Hall - IR-based hall reverb with various types

Cathedral - IR-based cathedral reverb with various types

Plate - IRs from UVI Plate plugin

Spring - IR-based spring reverb with various types

Surreal - IR-based special reverb with various types

- » **Size** *[Parametric mode]* - Set the reverb room size
- » **Decay** - Set the reverb decay time
- » **High** *[Parametric mode]* - Set the decay ratio [relative to the main Decay time] for higher frequencies
- » **Low** *[Parametric mode]* - Set the decay ratio for lower frequencies
- » **Type** *[IR Based modes]* - Set the reverb [IR] type
- » **Width** *[IR Based modes]* - Adjusts the stereo width

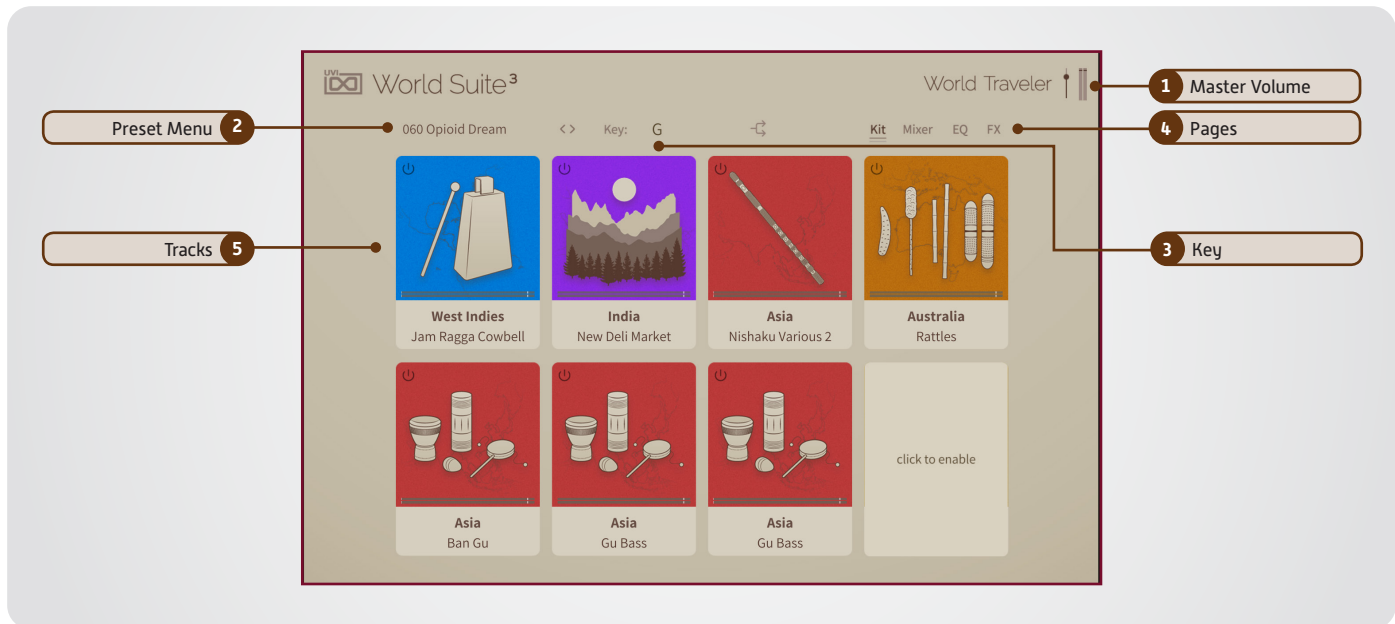

4 ► EQ

- » **High** - Set the high frequency band gain
- » **Mid** - Set the mid frequency band gain
- » **Low** - Set the low frequency band gain
- » **f** **[Crossover Frequency]** - Set the frequency between low and mid bands, and between mid and high bands

World Suite³

UI - World Traveler - Kit

1 Master Volume

Set the global output level with VU

2 Preset Menu

Change presets with drop-down menu or by using the [<] [>] buttons

3 Key

Indicates the root key detected from current incoming MIDI notes, click-drag to set manually

4 Pages

Change current page: Kit, Mixer, EQ and FX

5 Tracks

» **Power** - Click to enable/disable the track

» **Instrument**

Displays the instrument image according to the selected sample

Click the image to access the sample browser

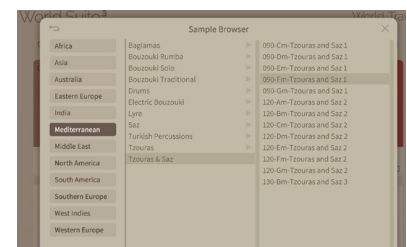

Hover the instrument name to show the [<] [>] buttons to navigate samples

» **Track Level meter**

Indicates track output level

» Sample Browser

Load a sample, region (left column), Instruments (middle column) and loop/phrase (right column)

↶ [Undo Edits] - Click to exit the editor without changes

X [Close] - Click to close the editor and save changes

How to Play

Play/stop and pitch controls can be played from a MIDI keyboard with keys C3-B3 or C1-C2 for individual tracks

» **Play/Stop All** C3-B3 *[keys control global tune, allowing chromatic playback]*

» Play/Stop Track 1 C1	» Play/Stop Track 4 F1	» Play/Stop Track 7 B1
» Play/Stop Track 2 D1	» Play/Stop Track 5 G1	» Play/Stop Track 8 C2
» Play/Stop Track 3 E1	» Play/Stop Track 6 A1	

UI - World Traveler - Mixer and EQ

1 ► Pages

Change current page: Kit, Mixer, EQ and FX

2 ► Mixer

- » **Power**
- Click to enable/disable the track
- » **Level**
- Adjust the track level
- » **Pan**
- Set the track pan
- » **Pitch**
- Adjust the sample pitch
- » **Reverb**
- Set the reverb send level
- » **Delay**
- Set the delay send level
- » **Track Level meter**
- Indicates track output level

3 ► Output Mode

Switch between stereo output or multi-output mode

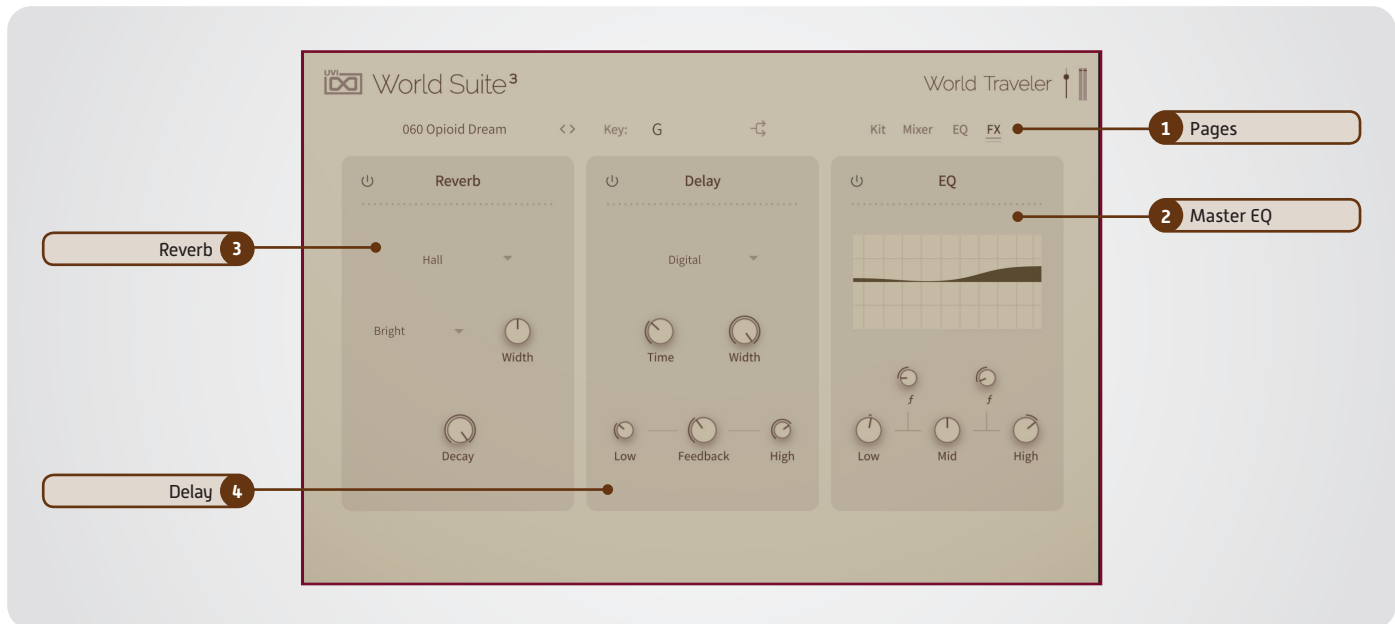

Part / Output channel in multi mode:

Send FX	Main
Part 1	Out 2
Part 2	Out 3
Part 3	Out 4
Part 4	Out 5
Part 5	Out 6
Part 6	Out 7
Part 7	Out 8
Part 8	Out 9

4 ► EQ

- » **Power**
- Click to enable/disable the track
- » **High**
- Set the high frequency band gain
- » **Mid**
- Set the mid frequency band gain
- » **Low**
- Set the low frequency band gain

UI - World Traveler - FX

1 ► Pages

Change current page: Kit, Mixer, EQ and FX

2 ► Master EQ

- » **Power** - Click to enable/disable the effect
- » **High** - Set the high frequency band gain
- » **Mid** - Set the mid frequency band gain
- » **Low** - Set the low frequency band gain
- » **f [Crossover Frequency]** - Set the frequency between low and mid bands, and between mid and high bands

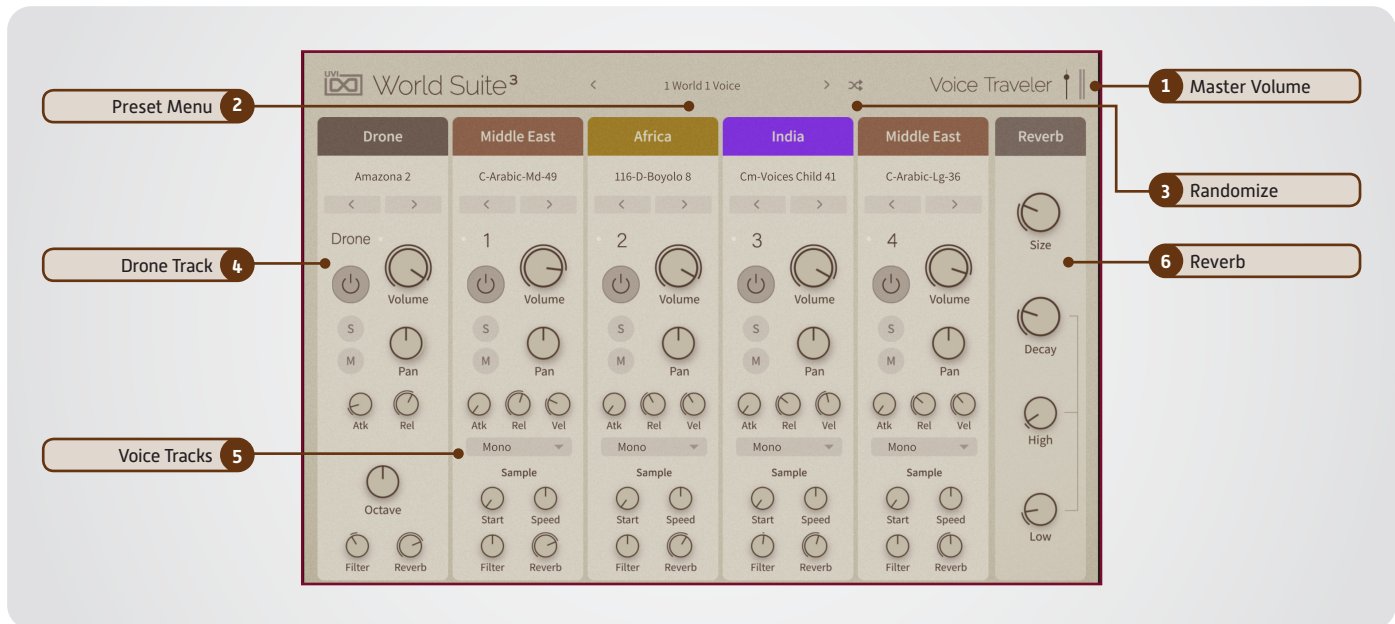

3 ► Reverb

- » **Power** - Click to enable/disable the effect
- » **Reverb modes**
 - Parametric* - Sparkverb
 - Hall* - IR-based hall reverb with various types
 - Cathedral* - IR-based cathedral reverb with various types
 - Plate* - IRs from UVI Plate plugin
 - Spring* - IR-based spring reverb with various types
 - Surreal* - IR-based special reverb with various types
- » **Size [Parametric mode]** - Set the reverb room size
- » **Decay** - Set the reverb decay time
- » **High [Parametric mode]** - Set the decay ratio (relative to the main Decay time) for higher frequencies
- » **Low [Parametric mode]** - Set the decay ratio for lower frequencies
- » **Type [IR Based modes]** - Set the reverb (IR) type
- » **Width [IR Based modes]** - Adjusts the stereo width

4 ► Delay

- » **Power** - Click to enable/disable the effect
- » **Delay modes**
 - Digital* - Typical digital delay
 - Tape* - Tape Echo
 - Velvet* - A smooth aura of echoes
- » **Time** - Set the delay time
- » **Width [Digital mode]** - Adjusts the stereo width
- » **Rate [Tape mode]** - Set the rate of delay repeats
- » **Feedback [Digital & Tape mode]** - Set the delay feedback amount
- » **LP [Digital mode]** - Low-pass filter for the delay signal
- » **HP [Digital mode]** - High-pass filter for the delay signal
- » **Diffusion [Velvet mode]** - Set the amount of diffusion (echo density)
- » **Spread [Velvet mode]** - Set the time spread of the diffusion

UI - Voice Traveler

1 ► Master Volume

Set the global output level with VU

2 ► Preset Menu

Change presets with drop-down menu or by using the [<] [>] buttons

3 ► Randomize ⌘

Randomly changes the samples loaded on all 5 tracks

4 ► Drone Track

- » **Instrument menu** - Choose drone sound with drop-down menu or by using the [<] [>] buttons
- » **Track On/Off** ⏻
- » **Mute [M] / Solo [S]**
- » **Volume / Pan** - Adjust the track level and pan
- » **Attack / Release** - Simple envelope controls
- » **Octave** - Set the octave shift
- » **Filter [HP/LP]** - A combination LP/HP filter; full LP on the left, full HP on the right, center has no effect
- » **Reverb** - Adjust reverb send level

5 ► Voice Track 1-4

- » **Instrument menu** - Choose with drop-down menu or by using the [<] [>] buttons
- » **Track On/Off** ⏻
- » **Mute [M] / Solo [S]**
- » **Volume / Pan** - Adjust the track level and pan
- » **Attack / Release** - Set AR envelope times, affects Volume
- » **Velocity** - Adjust the velocity sensitivity
- » **Trigger Mode**
 - Mono** - monophonic playback
 - Poly** - polyphonic playback
 - Poly Legato** - enables legato, subsequent polyphonic triggers will start the sample where other running voices are, useful for polyphonic vocal harmonies

- » **Sample Start / Speed** - Set the sample start point and the playback speed
- » **Filter [HP/LP]** - A combination LP/HP filter; full LP on the left, full HP on the right, center is no effect
- » **Reverb** - Adjust reverb send level

6 ► Reverb

- » **Room Size**
- » **Decay** - Set the reverb decay time
- » **High / Low** - Set the decay ratio for higher and lower frequencies

MIDI Mapping

- » **Key Ranges** The Colors reflect each track and voice ranges. The brightest key is the root pitch
- NOTE:** The color of the voice tracks and key range will be displayed according to the selected region.

UI - Keyboard Mappings

► Overview

World Suite 3 provides a wide variety of instruments, and special key mappings are available for many of them.

1 ► Original Instrument Pitch

The colored keys - BROWN in almost cases - are indicated the original pitch of the instrument. The GRAY keys are indicates out of the sound range

2 ► Keyswitches

Keyswitches are used for changing the articulation/layer of the instrument.

In World Suite 3, most of the keyswitches are shown in RED.

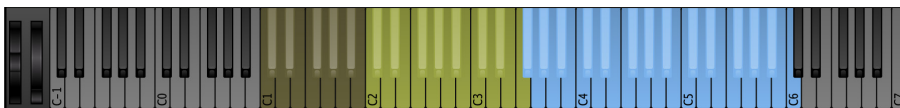

3 ► Instrument with chord recognition

CASE#1

Play your chords in the YELLOW section of the keyboard, and the instrument will perform for you, synced to the tempo! In this case, play the root note and the 3rd note to trigger the dedicated chord - a minor 3rd interval will trigger a minor chord and a major 3rd interval will trigger a major chord rhythm.

In this case the WHITE and BLACK keys trigger the rhythm sequence of the preset. Thus to play the instrument fully, we can hold two or more YELLOW keys and one WHITE or BLACK key at the same time.

CASE#2

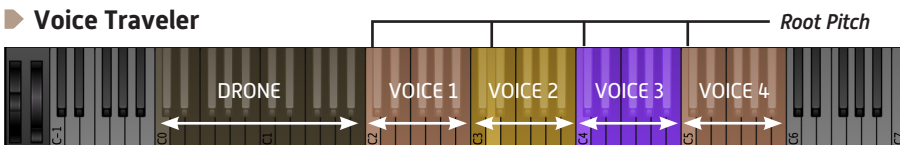

Here, we can play chords with the GREEN keys. A chord recognition algorithm recognizes chords played on these keys and plays back chord samples.

4 ► World Traveler

Here the COLORED keys trigger tracks individually, while the WHITE and BLACK keys transpose all track.

5 ► Voice Traveler

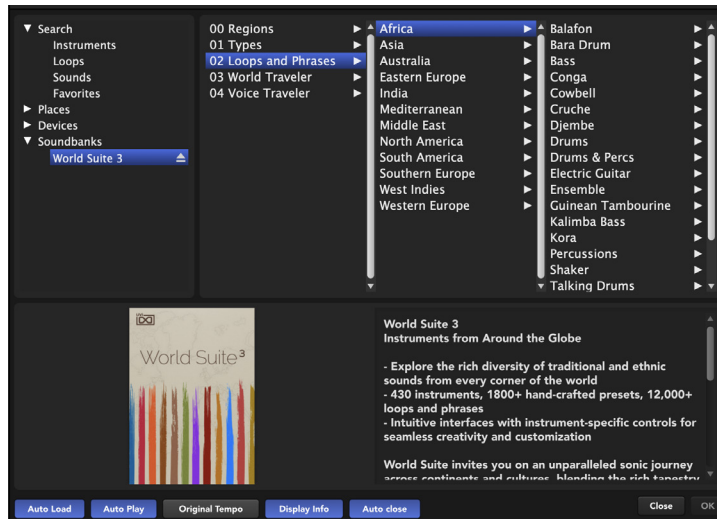

Here the Colors reflect track's range, where the brightest key represents the root pitch.

World Suite³

Samples - Loops and Phrases

► Overview

World Suite 3 comes with over 12,000 loops, melodic loops, phrases and vocals. All samples are tempo synced and loopable (.wav files) for use in your DAW or other plugins. Files are divided into two categories and organized by groups. Sample files can be drag-and-dropped directly from the browser or single part window into your DAW or onto your desktop, or loaded as parts and played directly in UVI Workstation or Falcon.

For more information on using sample parts in UVI Workstation or Falcon please consult the respective user guide.

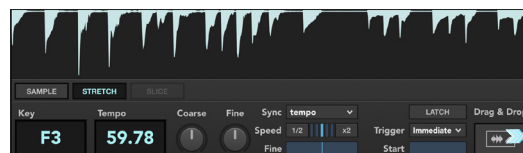

► Using Loops and Samples

Load a loop or sample through the browser, just like you would a regular UVI instrument.

Drag-and-drop to DAW, Desktop, etc.

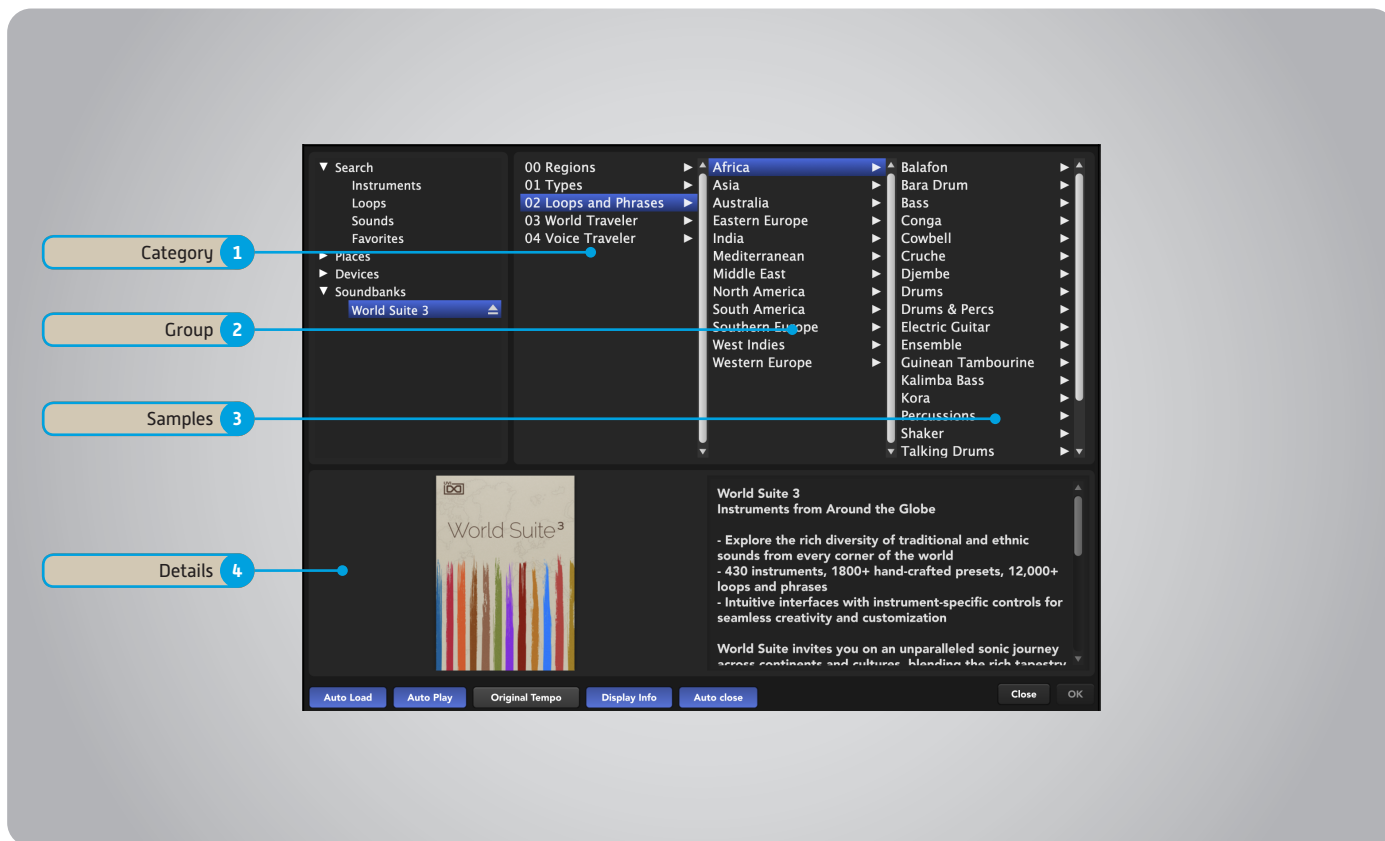

WAV files can be double-clicked and loaded as playable parts within UVI Workstation, or drag-and-dropped directly from the browser

Additionally you can drag-and-drop samples or loops to your DAW or desktop with the D&D button in a single part

Drag-and-drop to DAW, Desktop, etc.

Browser

1 ► Category Column

Categories are available to choose from

2 ► Groups

Groups are indicated with an arrow '>', click to view their content in the adjacent column

3 ► Samples

Samples are typically named as follows:

Tempo > Set > Description/Pitch

4 ► Details

Metadata for the instrument and file are displayed here

Sample Editor

1 ► Playback Behaviors

» Sample

Loop/phrase plays like a regular sampler
NOTE: Half/Double speed does not work in Sample mode

» Stretch

Sample length is not pitch-dependent, loop/phrase starts at the beginning of the loop/phrase

» Slice

Default mode

NOTE: Sliced sound files can be switched to Stretch or Sample, but non-Sliced sound files cannot be switched

2 ► Controls

» Key, Tempo

Key displays the root key for the loop/phrase, Tempo controls the loop's rate

» Coarse, Fine

Adjust tuning in semitones or cents

» Sync

Off: Loop/phrase does not sync to tempo
 Tempo: Follow Tempo, but not position
 Position: Tempo and position are followed
NOTE: Not available on phrases

» Speed

Adjust speed in relation to Tempo and Sync settings, Double-click to reset, Half/Double: Slow to 1/2 or 1/4; Speed to 2x or 4x of the assigned tempo, Fine works similarly, but with any rate value

» Latch

The loop/phrase will play even after you release a controller key
 Stretch/Slice: it will repeat indefinitely
 Sample: it will play once, then stop
NOTE: hit the same controller key again to silence the loop/phrase

» Trigger

Immediate: instantly triggers
 Next Beat: triggers on beat
 Next Bar: triggers at measure

» Slice Start

Sample/Stretch: define where the sample will begin within the sound file
 Slice: provides a range from the first slice of the sample to the last slice

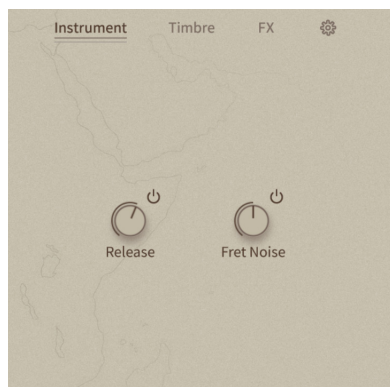

» Drag & Drop

Export raw wave, when Slice/Map is enabled exports MIDI map of sliced sample notes

3 ► Transport

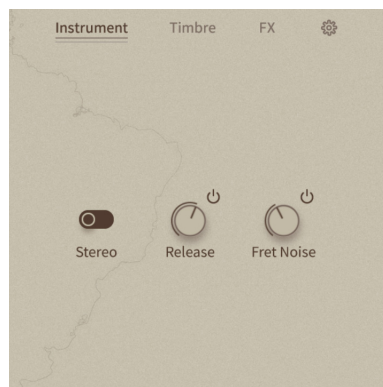

Tempo editable via tap, click-drag, or manual entry via double-click, stop, sync-to-host, play

UI - Solo Instrument - Unique Parameters

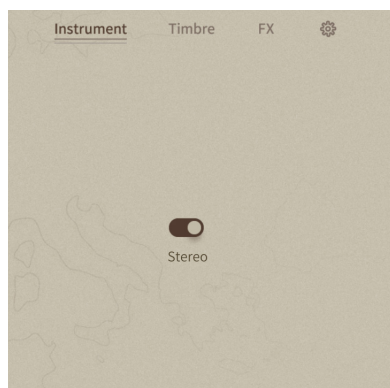

Available on some Fretted Instruments

- » **Power**  - Click to enable/disable the function
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level
- » **Fret Noise** - Activates a discrete layer that emphasizes the fret noise, adjust level

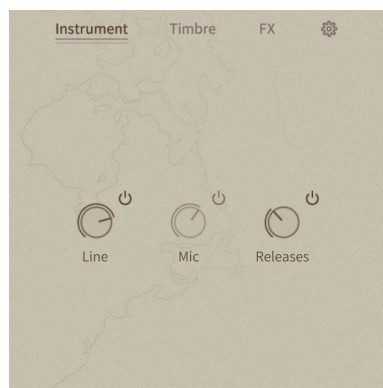

Available on some Fretted Instruments

- » **Stereo** - Enable/disable stereo mic mode
- » **Power**  - Click to enable/disable the function
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level
- » **Fret Noise** - Activates a discrete layer that emphasizes the fret noise, adjust level

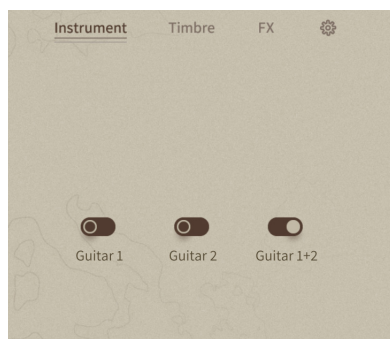

Available on some Fretted Instruments

- » **Stereo** - Enable/disable stereo mic mode

Available on some Fretted Instruments

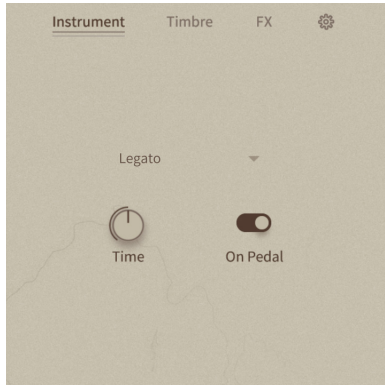

- » **Power**  - Click to enable/disable the function
- » **Line** - Adjusts level of DI recordings
- » **Mic** - Adjusts level of Mic recordings
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level

Available on some Fretted Instruments

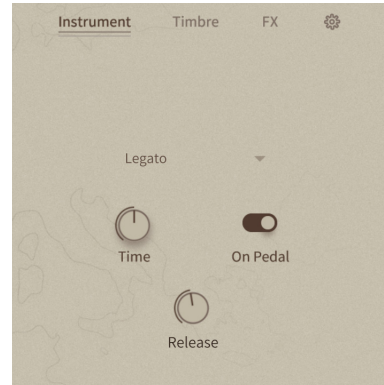

- » **Guitar 1 / 2 / 1+2** - Switch between guitars

UI - Solo Instrument - Unique Parameters

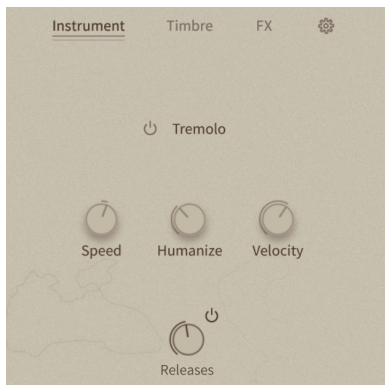

Available on some Fretted, String and Woodwinds Instruments

- » **Voice Mode**
 - Polyphonic** - Allows the voicing of multiple notes simultaneously
 - Legato** - Only one note can be voiced at a time, previous notes are cut off as new notes are struck
 - Portamento** - Only one note can be voiced at a time, previous notes are cut off as new notes are struck, new notes bend into pitch from the direction of the last note struck
- » **Time** - Adjust the duration of the pitch bend
- » **On Pedal (Legato and Portamento only)** - Use a Sustain pedal (CC#64) to switch between legato and portamento modes

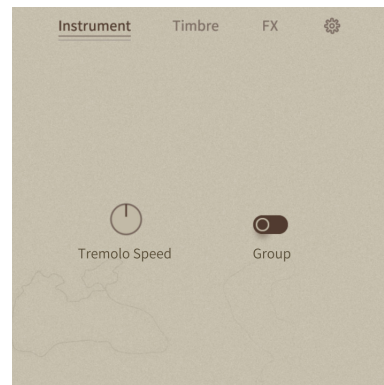

Available on some Fretted, String and Woodwinds Instruments

- » **Voice Mode**
 - Polyphonic** - Allow the voicing of multiple notes simultaneously
 - Legato** - Only one note can be voiced at a time, previous notes are cut off as new notes are struck
 - Portamento** - Only one note can be voiced at a time, previous notes are cut off as new notes are struck, new notes bend into pitch from the direction of the last note struck
- » **Time** - Adjust the duration of the pitch bend
- » **On Pedal (Legato and Portamento only)** - Use a Sustain pedal (CC#64) to switch between legato and portamento modes
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level

Available on some Fretted Instruments

- » **Power** - Click to enable/disable the function
- » **Speed** - Set the tremolo speed
- » **Humanize** - Adjust the tremolo groove
- » **Velocity** - Adjust the velocity randomness of tremolo
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level

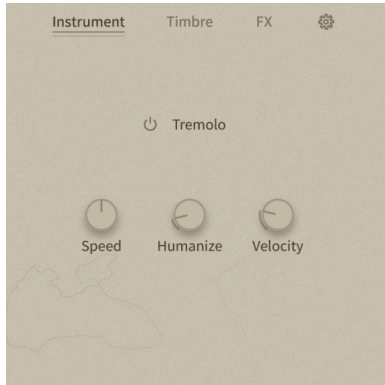

Available on some Fretted Instruments

- » **Speed** - Set the tremolo speed
- » **Group** - Activates multiple voices to increase sense of space

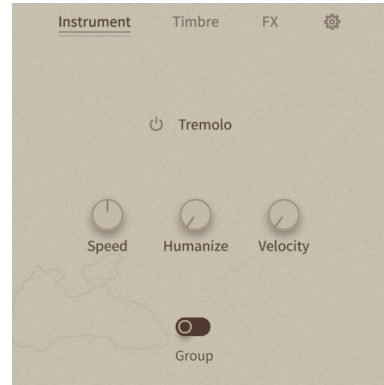

NOTE: tremolo effects may not work with certain articulations

UI - Solo Instrument - Unique Parameters

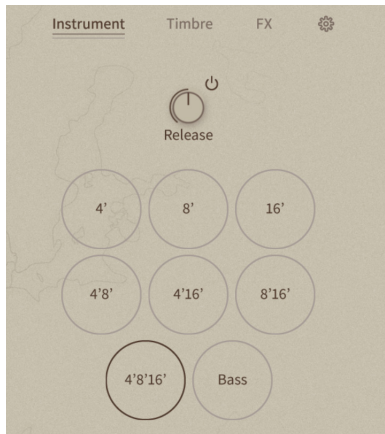

Available on some Fretted Instruments

- » **Power**  - Click to enable/disable the function
- » **Speed** - Set the tremolo speed
- » **Humanize** - Adjust the tremolo groove
- » **Velocity** - Adjust the velocity randomness of tremolo

Available on some String Instruments

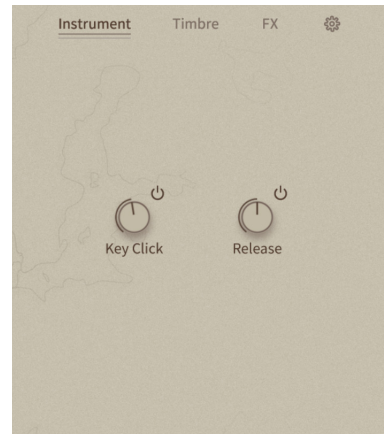

- » **Power**  - Click to enable/disable the function
- » **Speed** - Set the tremolo speed
- » **Humanize** - Adjust the tremolo groove
- » **Velocity** - Adjust the velocity randomness of tremolo
- » **Group** - Activates multiple voices to increase sense of space

Available on some Keyboard Instruments

- » **Power**  - Click to enable/disable the function
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level
- » **Registers** - Click to choose or enable the tone / sound

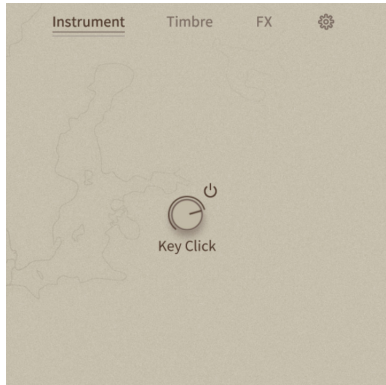

NOTE: the number and content of available registers varies by instrument

Available on some Keyboard Instruments

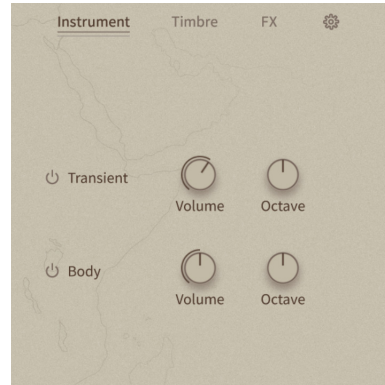

- » **Power**  - Click to enable/disable the function
- » **Key Click** - Activates a discrete layer that emphasizes the key click noise, adjust level
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level

UI - Solo Instrument - Unique Parameters

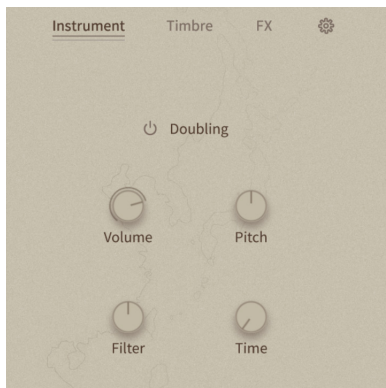

Available on some Keyboard and Woodwinds Instruments

- » **Power**  - Click to enable/disable the function
- » **Key Click** - Activates a discrete layer that emphasizes the key click noise, adjust level

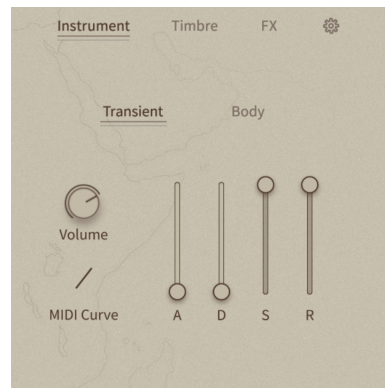

Available on some Metal and Gong Instruments

- » **Power**  - Click to enable/disable the function
- » **Transient Level / Octave** - Activates a discrete layer that emphasizes the attack phase, adjust level and octave shift
- » **Body Level / Octave** - Activates a discrete layer that emphasizes the sustain phase, adjust level and octave shift

Available on some Metal and Gong Instruments

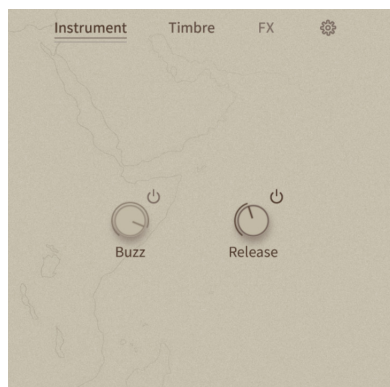

- » **Doubling**  - Add a secondary hit with variable volume, pitch and filtering for more impact
- » **Volume** - Set the volume for second voice
- » **Pitch** - Adjust the second voice pitch
- » **Filter** - Adjust tone with unified low-pass/high-pass filter
- » **Time** - Set the second voice timing, offset from the first voice

Available on some Metal and Gong Instruments

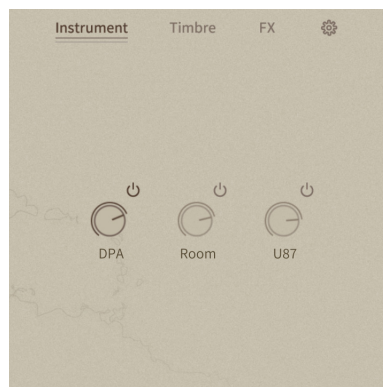

- » **Pages** - Change current page Transient and Body
- » **Volume** - Adjust the level
- » **MIDI Curve** - Adjust the key touch
- » **ADSR** - Adjust the layer level over time using an Attack [A]/Decay [D]/Sustain [S]/Release [R] envelope

UI - Solo Instrument - Unique Parameters

Available on some Metal and Gong Instruments

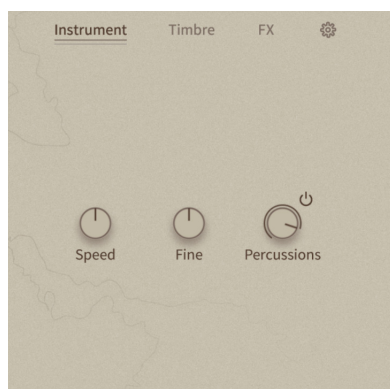

- » **Power**  - Click to enable/disable the function
- » **Buzz** - Activates a discrete layer that emphasizes the distinct noise, adjust level
- » **Release** - Activates a discrete layer that emphasizes the release phase, adjust level

Available on some Metal and Gong & Percussion Instruments

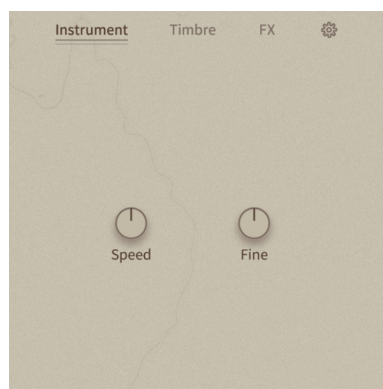

- » **Power**  - Click to enable/disable the mic layer
- » **Volume** - Set the mic volume

NOTE: the number and type of available mics varies by instrument

Available on some String Instruments

- » **Power**  - Click to enable/disable the function
- » **Speed** - Adjust the performance speed
- » **Fine** - Fine-tune the pitch
- » **Percussion** - Adjust the level of the percussions layer

Available on some String Instruments

- » **Speed** - Adjust the performance speed
- » **Fine** - Fine-tune the pitch

Panduri Rhythm

Yellow Keys	Key Switches
Chord Recognition C1-G2	Ballada C3
	Basic C#3
	Doubleto D3

Play your chords in the yellow section of the keyboard, and the instrument will perform for you, synced to the tempo! In this case, play the root note and the 3rd note to trigger the dedicated chord - a minor 3rd interval will trigger a minor chord and a major 3rd interval will trigger a major chord rhythm

Switch the rhythm sequence of the preset.
