Introduction

Percussion Factory Creative Rhythm Designer

THE ART OF RHYTHM

Percussion Factory 2 is a complete percussion playground, giving you an expressive 8-part engine designed to create everything from detailed world ensembles to modern electronic kits, driving grooves, abstract ambient textures, and beyond. With smart tools like real-time modifiers, morphable groove, and sequence generation, Percussion Factory 2 helps you discover new ideas fast, and lets you shape every sound with performance-ready controls.

Version 2 improves Percussion Factory with an all-new collection of 386 electronic and 281 foley percussion sources, expanded preset library, enhanced effects, and an all-new dark mode UI. Combined with its already extensive acoustic library, Percussion Factory 2 represents one of the most comprehensive and versatile percussion instruments available today.

A UNIFIED CREATIVE TOOLKIT

Designed as an all-in-one solution for rhythm creation, Percussion Factory 2 gives you complete control over sounds, sequence, and performance. Its clever engine combines smart preset generation, per-part editing, real-time modifiers, and deep sound design tools, all in one inspiring and intuitive instrument.

CREATE

Dive into a massive library of acoustic, electronic, and foley percussion samples, organized into intuitive categories such as Hand Drums, Shaken, Metal, Friction, and Wood. Easily tweak, layer, or swap sounds on the fly. From classic studio drums to found-sounds and custom kits, Percussion Factory 2 offers an extensive palette from which to build your rhythms.

GROOVE

The built-in sequencer lets you craft and transform patterns in real-time with powerful, performance-focused features. Sample auto-alignment ensures tight transients, while dynamic modifiers, per-part timing offsets, and a morphable groove engine allow deep rhythmic expression. Push and pull your beats off-grid and inject motion into your patterns with ease.

TWEAK

Each of the 8 parts includes a full suite of sound shaping tools. Control amplitude, pitch, and filter, add variation with probabilistic cutoff modulation, process with creative effects including bit crushers, flangers, EQ, and granulizer, and finalize your sound with IR or parametric reverb, and studio-grade tape and digital delay engines.

PERFORM

Crafted with live use in mind, Percussion Factory 2 delivers powerful tools for on-the-fly performance. Take control with real-time sequence decimation, solo and mute keys, per-part evolution, and performance macros that let you inject spontaneity and motion into every groove.

GENERATE

Jumpstart your inspiration with intelligent sequence generation, powered by a smart engine trained on real-world musical structures. With a single click, explore millions of useful variations across styles and moods, perfect when you need a fresh perspective or a creative spark.

EXPLORE

Explore over 1,600 percussion sounds, 10,000+ samples, and 800+ presets that span styles from modern production to regional traditions from Africa, India, the Middle East, North and South America, and beyond. Create with onboard content or import your own via drag-and-drop user sample support.

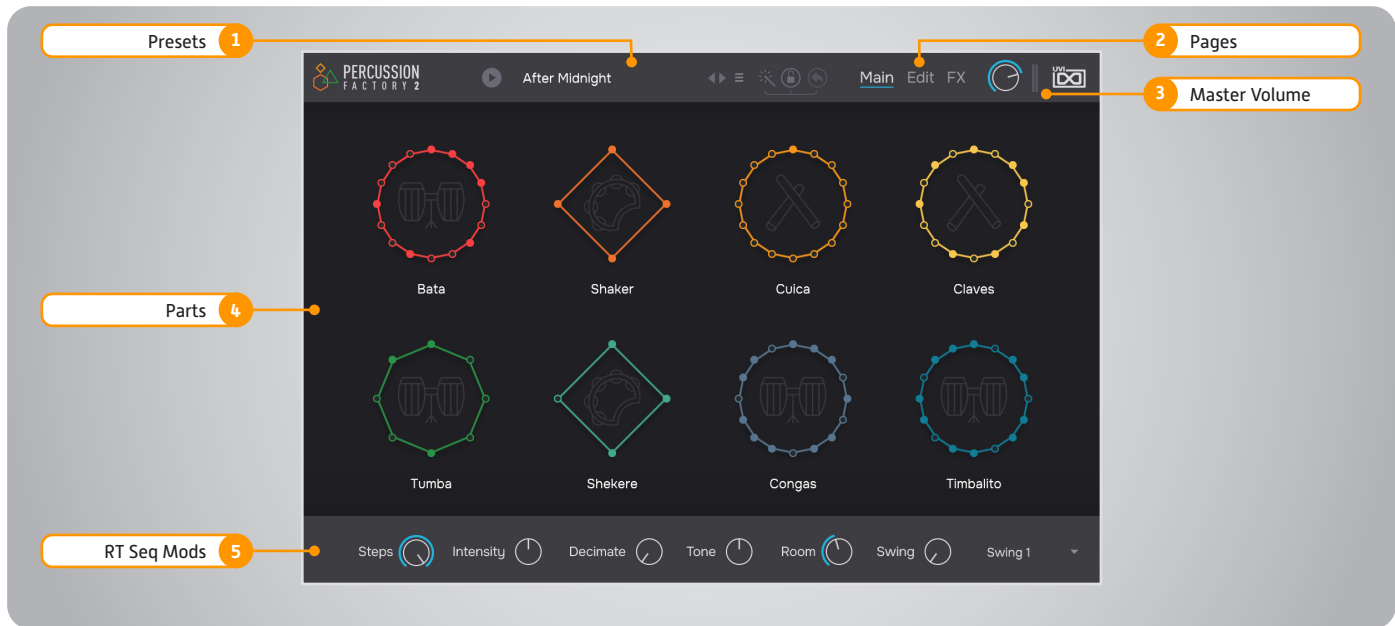

With a refined interface, expanded sound library, and powerful sequencing engine, Percussion Factory 2 is your go-to instrument for all things rhythm. Effortless to use, endlessly creative, and deeply inspiring, its rhythm redefined.

Minimum System Requirements

- Latest version of UVI Workstation or Falcon
- 141GB of disk space

For more information on the installation process, please refer to the document: [Soundbank Installation Guide](#)

User Interface - Main

1 Presets

- » **Play** - Click the button to play or stop the sequencer
- » **Presets** - Select preset via the drop-down menu or by using the arrows. Use the Init drop-down menu to initialize preset or parts. Use the menu to save and load a user preset
- » **New Preset** - Click the button to generate a new preset
- » **Lock Sound** - Enable to preserve your current sound settings when generating new presets
- » **Undo** - Revert to previous setting

2 Pages

Change current page: Main, Edit and global FX page

3 Master Volume

Set the Output Gain with stereo meter

MIDI Mappings

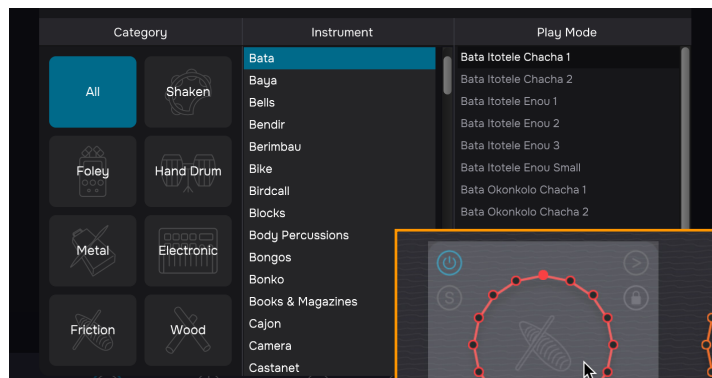

- » **Sequence Play** C4
- » **Part1~8 Sequence Play** C2~C3
- » **Part1~8 Sound trigger** C0~C1

4 Parts

Each of the 8-parts is visualized on the main page. Mouse-over a part to reveal additional controls.

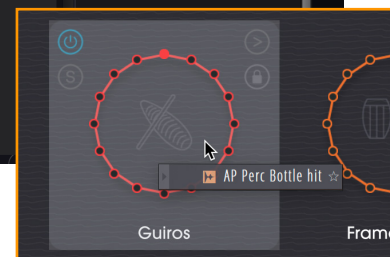

- » **Power** - Enable/disable the part
- » **Solo** - Solo the part
- » **Part Sound Edit** - Navigate to the part's Edit-Sound page
- » **Lock Sound** - Lock a part to preserve its sound settings while changing presets
- » **Sequence Indicator** - Show the current sequence of the part
- » **Sound** - Click the name or icon to open the browser

5 Real-Time Seq Modifiers

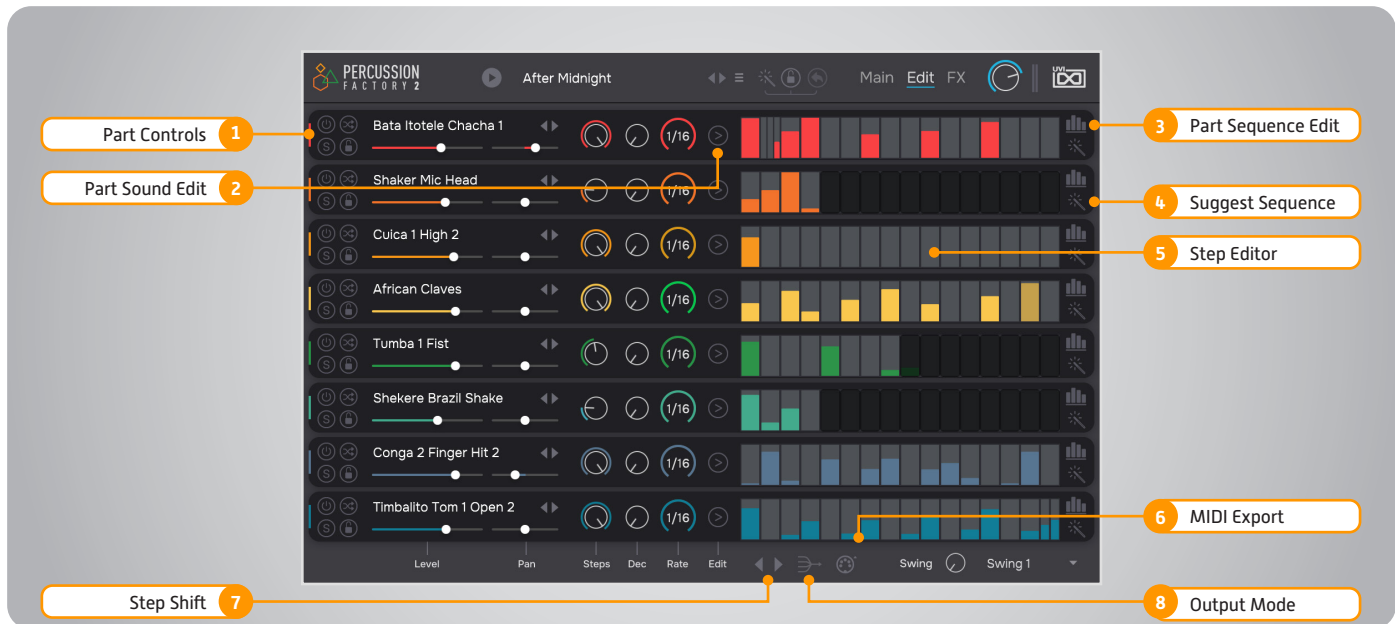

Realtime effects augment the sound and sequence of all parts simultaneously

- » **Steps** - Reduces sequence length
- » **Intensity** - Boost or reduce the dynamics
- » **Decimate** - Non-destructively disables active sequencer steps
- » **Tone** - Positive values boost highs, and cut lows. Negative values boost lows, and cut highs.
- » **Room** - Reverb send amount
- » **Swing** - Swing amount with groove profiles

- » **User samples** - To load your own sample in a layer, simply drag-and-drop

User Interface - Edit

1 ► Part Controls

- » **Power**  - Enable/disable the part*
- » **Solo**  - Solo the part*
- » **Randomize**  - Click to randomize the part sound
- » **Lock Sound**  - Lock a part to preserve its sound settings while changing presets*
- » **Sound** - Click to open browser, or use the  arrows to change the sound
- » **Part Volume** - Adjust the part volume
- » **Part Pan** - Adjust the stereo position of the part
- » **Steps** - Set the step length of the part
- » **Decimate** - Non-destructively disables active sequencer steps
- » **Rate** - Per-part sequence speed

*Same as on Main page

2 ► Part Sound Edit

Navigate to the part's Edit-Sound page

3 ► Part Sequence Edit

Navigate to the part's Edit-Sequence page

4 ► Suggest Sequence

Algorithmically generates a new and musically relevant sequence

5 ► Step Editor

Click-drag to adjust step velocity

6 ► MIDI Export

Export the sequence as MIDI to DAW or desktop.

Click the "MIDI icon" , then drag the "D&D icon"  button appears at right and drop to DAW's MIDI/Instrument track or desktop

Note: the MIDI file will need to be re-exported on tempo/preset change because the auto-align features of some instruments like shaker and tambourine are tempo dependent

7 ► Step Shift

Use the  arrows to shift all sequences step left or right

8 ► Output Mode

Switch between stereo output or multi-output mode

Part / Output channel in multi mode

Send FX	Main
Part 1	Out 2
Part 2	Out 3
Part 3	Out 4
Part 4	Out 5
Part 5	Out 6
Part 6	Out 7
Part 7	Out 8
Part 8	Out 9

User Interface - Edit | Sound

1 Edit Panels

Switch between Sound, Seq, and FX editors.

Change selected part using the [>] buttons on the side. Click [>] again to close the editor.

2 Amplitude

- » **Pitch** - Adjust the pitch
- » **Dynamic** - Adjust the velocity dynamics
- » **Smooth Filter** - Set the velocity amount of LP 6dB/oct filter for smooth timbre changes
- » **Curve** - Adjust the dynamic response curve
- » **ADSR** - Adjust the part level over time using an Attack/Decay/Sustain/Release envelope
- » **Attack and Decay Curve** - Adjust the curve amount applied to Attack, and Decay/Release envelope stages

3 Filter

- » **Power** - Activate the filter
- » **Mode** - Set the filter mode, between lowpass, bandpass, and highpass filter shapes
- » **Cutoff** - Set the filter cutoff frequency
- » **Random Cutoff** - Set the amount of filter cutoff frequency randomization
- » **Q** - Set the filter resonance amount
- » **Drive** - Set the filter drive amount
- » **Envelope Depth** - Set the filter envelope depth amount
- » **ADSR** - Typical ADSR envelope for the Filter
- » **Attack and Decay Curve** - Adjust the curve amount applied to Attack, and Decay/Release envelope stages

User Interface - Edit | Seq

1 Edit Panels

Switch between Sound, Seq, and FX editors.

Change selected part using the [>] buttons on the side. Click [>] again to close the editor.

2 Sequence Editor

- » **Sequence Commands** ≡
 - › **Save** - Click to save a new preset
 - › **Load** - Click to load a user preset
- » **Shift** - Use the ◀▶ arrows to shift the sequence 1 step left or right
- » **Preset** - Select the sequencer preset by drop-down menu or ◀▶ arrows
- » **Vel** - Click-drag to set the velocity
- » **Div** - Set the step repeats
- » **Pitch** - Set the pitch shift
- » **Gate** - Set the step gate duration
- » **Skip%** - Set the step probability

3 Global Sequence Controls

- » **Suggest**  - Algorithmically generates a new and musically relevant sequence
- » **Clear**  - Click to initialize the sequencer
- » **Auto Align**  - Enables an automatic offset to factory-supplied samples for more precise transient alignment
Note: has no effect on user samples
- » **Offset** - Adjust playback timing forward or backward in ms

User Interface - Edit | FX

1 Edit Panels

Switch between Sound, Seq, and FX editors.

Change selected part using the [>] buttons on the side. Click [>] again to close the editor.

2 Crusher

- » **Power** ☹ - Enable/disable the effect
- » **Drive** - Adjust the distortion amount
- » **Gain Out** - Adjust the output gain of the effect

3 Flanger

- » **Power** ☹ - Enable/disable the effect
- » **Frequency** - Set the modulation speed
- » **Host Sync off** - Set the speed at Hz
- » **Host Sync on** - Set the speed at musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Host Sync**  - Enable/disable the modulation speed sync to host (DAW project) tempo
- » **Time** - Set the delay time of the effect
- » **Feedback** - Set the feedback amount
- » **Mix** - Set the effect dry/wet balance

4 Frequency Shifter

- » **Power** ☹ - Enable/disable the effect
- » **Coarse** - Set the effect intensity
- » **Spread** - Set the channel shift offset
- » **Mix** - Set the effect dry/wet balance

5 Equalizer

- » **Power** ☹ - Enable/disable the effect
- » **High** - Set the high frequency band gain
- » **Mid** - Set the middle frequency band gain
- » **Low** - Set the low frequency band gain
- » **Crossover Frequency f** - Set the crossover frequency between low and middle bands, and between middle and high bands

6 Effect Sends

- » **Power** ☹ - Enable/disable the effect
- » **Delay Amount** - Set the delay send level
- » **Reverb Amount** - Set the reverb send level

User Interface - FX

1 ► Reverb

- » **Power**  - Enable/disable the effect
- » **IR Mode** - Switch to the IR reverb mode
 - » **IR Chooser** - Change the impulse response (IR) via the drop-down menu or by using the ◀▶ arrows
 - » **Time** - Set the reverb time
 - » **Predelay** - Set the predelay time
 - » **Width** - Adjust the stereo width of the reverb
 - » **Gain** - Sets the effect output level
- » **Parametric Mode** - Switch to the parametric reverb mode
 - » **Size** - Set the reverb room size
 - » **Decay** - Set the reverb decay time
 - » **High** - Set the decay ratio [relative to the main Decay time] for higher frequencies
 - » **Low** - Set the decay ratio for lower frequencies
 - » **Gain** - Sets the effect output level

2 ► Delay

- » **Power**  - Enable/disable the effect
- » **Digital Mode** - Switch to the digital delay mode
 - » **Time** - Set the delay time
 - » **Feedback** - Set the feedback amount
 - » **LowCut** - Set the delay output's high-pass filter frequency
 - » **HighCut** - Set the delay output's low-pass filter frequency
 - » **In:Width** - Set the stereo width of the delay input signals
 - » **Out:Width** - Set the stereo width of the delay output signals
 - » **Gain** - Sets the effect output level
- » **Tape Mode** - Switch to the tape delay mode
 - » **Time** - Set the delay time
 - » **Feedback** - Set the feedback amount
 - » **Rate** - Set the rate of delay repeats
 - » **Gain** - Sets the effect output level

3 ► Drive

- » **Power**  - Enable/disable the effect
- » **Amount** - Adjust the distortion amount
- » **Tone** - Adjust the brightness of the effect
- » **Gain** - Adjust the output gain of the effect

4 ► Maximizer

- » **Power**  - Enable/disable the effect
- » **Threshold** - Adjust the threshold level

5 ► Grains

- » **Power**  - Enable/disable the effect
- » **Coarse** - Adjust the grain size
- » **Density** - Set the amount of the grains
- » **Mix** - Set the effect dry/wet balance

6 ► Bitcrusher

- » **Power**  - Enable/disable the effect
- » **Frequency** - Set the sample rate reduction
- » **Bit Depth** - Set the bit reduction
- » **Mix** - Set the effect dry/wet balance

7 ► EQ

- » **Power**  - Enable/disable the effect
- » **High** - Set the high frequency band gain
- » **Mid** - Set the middle frequency band gain
- » **Low** - Set the low frequency band gain
- » **Crossover Frequency f** - Set the crossover frequency between low and middle bands, and between middle and high bands
