Introduction

Mosaik - The Ultimate Inspiration Toolbox

Innovative production multitool powered by 12 charactered sound collections

Mosaik invites you to a powerful new world where sound takes shape through color, contrast, and motion. Browse +2,000 innovative presets within 12 genre-based collections, and create rich, evolving instruments that feel alive. Sculpt them with advanced effect chains, and perform with intuitive controls. Mosaik turns inspiration into form with clarity and ease.

Your new go-to music creation playground

PLAY

Discover an innovative and modern approach to music production. Play chords progressions, sequences, and kits like never before or take full control with the Keyboard Mode.

TWEAK

Refine with advanced controls and interactive effects. Put creativity at the forefront with a nimble and adaptive interface.

EXPLORE

Browse 2,000+ innovative presets within 12 genre-based collections. Boost your inspiration with an endless combination of sounds through advanced randomization options.

Both flexible and deep, Mosaik is a chameleon-like workhorse, equally suited to create massive chords, powerful drums, or as a flexible sample-based instrument - it begs to be explored, and yields creative and inspiring results with little provocation. The included preset library offers a glimpse into Mosaik's potential, with 2,000+ presets of chords, drums, and kits, artfully crafted by the sound design team at UVI, and arranged in genre-based categories including Softpop, Tropical Heat, Hyperpop, Retrofuturism, Liquid Breaks, Electronic Rush, Beat Culture, Velvet R&B, Ethereal, Y2K, Broken Beats, and French Club - all available through a rich and immersive browser. Users can also easily design their own presets from the 2,000+ included sound sources, or using their own samples thanks to native drag-and-drop support.

Mosaik not only excels at quickly generating ideas, it provides a deep and powerful sound design toolkit, giving users an all-in-one solution to tweak, refine, and polish with speed and precision. Perfect your sounds with per-key control over amplitude, filter, pitch, EQ, humanization of velocity and pan, modulation, with LFO and step sequencer, and motion, allowing animation of your sounds with arpeggiator, phraser, or note sequencer - or iterate through exciting new territories with built-in mutation and randomization controls, available at both the sound and kit levels.

A limitless and instantly fun creative multitool, Mosaik delivers an innovative and modern approach to music production and sound design - allowing you to play, tweak, explore, and create endlessly, with inspiration as your guide.

ADDED IN VERSION 26

8 Modulation

- » **Power** - Click to enable/disable the section
- » **LFO/Step** - Toggle the modulator to edit

LFO

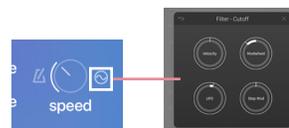

- » **Mode** - Set the voice mode between Legato and Retrigger
- » **Host Sync** - Enable/disable the modulation speed sync to host [DAW project] tempo
- » **Shape** - Select the modulation shape
- » **Phase** - Adjust the LFO start phase
- » **Speed** - Adjust the modulation speed
- » **Host Sync Off** - Set the speed in Hz
- » **Host Sync On** - Set the speed in musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Depth** - Set the modulation depth amount

Step Modulator

- » **Step Editor** - Click-drag to set the modulation amount per-step
- » **Steps** - Set the number of steps up to 64 steps
- » **Bipolar / Unipolar** - Switch between Bipolar and Unipolar mode
- » **Smooth** - Click to smooth the transition between steps
- » **Invert** - Invert the modulation pattern
- » **Clear** - Initialize the pattern
- » **Host Sync** - See LFO
- » **Speed** - Adjust the modulation speed
- » **Depth** - Set the modulation depth amount

Modulation Edit

At the right of modulatable parameters, click the button to open the Modulation Panel

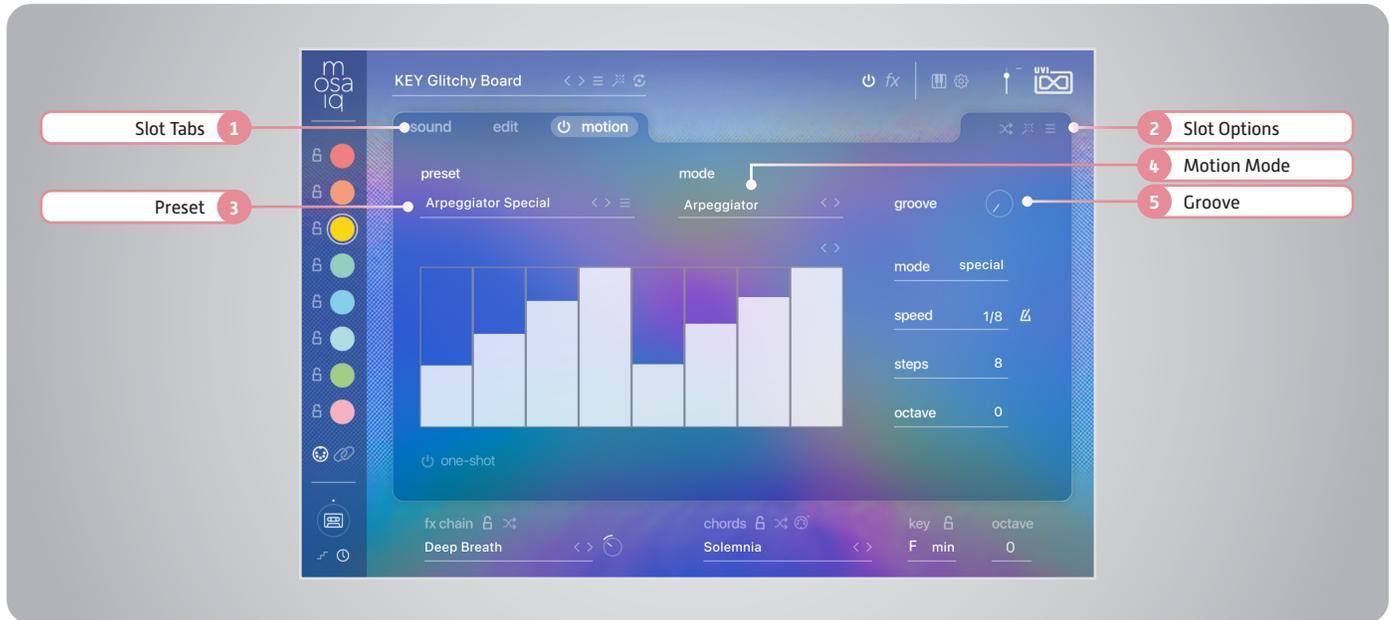

[Undo Edits] - Click to exit the editor without changes

[Close] - Click to close the editor

9 Equalizer

- » **Power** - Click to enable/disable the effect
- » **High** - Set the high frequency band gain
- » **Mid** - Set the mid frequency band gain
- » **Low** - Set the low frequency band gain
- » **f [Crossover Frequency]** - Set the frequency between low and mid bands, and between mid and high bands

User Interface - Slot (Motion)

1 Slot Tabs

2 Slot Options

See [Page 7](#) for details

3 Preset

- » **Presets** - Select motion preset with drop-down menu or by using the [←] [→] buttons
